MOTIVATION

To be able to apply to the best of my ability, the theoretical and practical knowledge I have.

Acquired in my professional training, to work and cultivate teamwork efficiency, personal Responsibility and accountability in management and administration of organizations for the better performance and well-being of the society and the Nation at large.

My main focus is to provide outstanding and exemplary leadership in the field of Environmental conservation, climate change issues (main interest in the influence of different grazing lands management on the emissions of GHG and vegetation dynamics) and to change the lives of people by providing long lasting solutions to challenges of poverty, environmental degradation, biodiversity conservation and changing climatic patterns.
